

Rhino Linings[®]
PREMIUM PROTECTION

Rhino ArmaFloor[®] 300

DESCRIPTION:

ArmaFloor[®] 300 is a pigmented, waterborne, two-component, rapid curing, epoxy coating system designed as durable coating for floors and other applications. High toughness and strength are characteristics of this coating system which also exhibits good resistance to hot tyre peel in garages and the like.

Formulated with low viscosity, this ambient cured resin system is grey in colour and is ideal for floors where speed of application is an important factor.

FEATURES & BENEFITS:

- Fast cure allowing rapid turnaround time; under normal conditions, return to service within 24 hours.
- Robust application window with ability to apply at low temperatures and high humidity.
- Excellent abrasion and impact resistance.
- Excellent chemical resistance.
- Bonds to virtually all substrates, including metals, woods, concrete, and fibreglass.
- Low VOC's; environmentally friendly.

APPLICATIONS:

- Excellent durability and aesthetics for floor, equipment and other coatings including:
 - Garage floors
 - Laboratories
 - Restaurant floors
 - Airplane hangars
 - Entry and lobby areas
- Creates a durable, seamless lining which conforms to any shape and size.
- Only appropriate floor cleaners should be used (contact Rhino Linings Technical Dept. for details).

COLOUR OPTIONS:

Colour – Grey, Light Grey, Neutral Grey, Koala Grey, White
Other colours available on request by special order.
